

Barbara A. Witham, Lamoine, ME.

I am a resident in the Union River Watershed. I am asking that the relicensing process for the Brookfield Hydro dam require the following to be guaranteed by the dam owner:

- a) Adequate upstream and downstream fish passage to allow 95% of all native species to pass.
- b) Water levels at Graham Lake be stabilized to protect the system from further harmful erosion
- c) Fluctuations in water levels at the lake be narrowed to prevent turbidity of the water
- d) 401 standards of the Clean Water Act be required
